

CONTENT GRAFFITI

Writing on desks is usually a no-no. But with proper writing instruments for the surface, students can enjoy writing content on the desk/table. This encourages every student to respond to every question/prompt and check their work and their neighbors. Chalk works great on science tables and dry erase markers work on light-colored smooth surfaces.

Shannon Robinson - Dueitt Middle School - Spring, TX

Test a small area first. With younger students tell them these are magic and only to be used here.
