CAROUSEL GRAFFITI—ELEMENTARY EXAMPLE

Carousel Graffiti is an outstanding culminating strategy at the end of unit or for assessing the understanding of several units at once. Julie Schilling makes sure to follow the critical attributes mentioned in the *Teaching For Excellence* to ensure the activity is successful. Her prompts are open ended enough that students will rarely be "finished" with a prompt.

In this second grade example, she asks students to list as many goods as they can think of on one page and as many services as they can think of on another page.
